## ELC-RS485

The ELC-RS485 is a RS485 communications card designed for the easy connection of our SuperRelay products where a MODBUS RTU RS485 network is required between the PLC's and any other RS485 MODBUS RTU device such as our Maple HMI's.

The LAST ELC-RS485 in the chain MUST have the terminating link installed (LK1).

Connections are as follows:

A (+) to RX+

B (-) to RX-

Com to GND
